

Smartphones and Tablets PCs are a must for mobile workers
/This is Why we wrote an App for printing, scanning and
file sharing.

Hassle-free Printing

Connect to a Wi-Fi network, select a document, preview and print directly to a supported Sharp MFP from your iPhone, iPad or Android device.

Simplified Scanning

Scan hard-copy documents to PDF for easy access by simply scanning from a Sharp MFP to your supported mobile device. Your mobile device's profile can be stored as a "scan-to" location on the MFP for easy access.

Seamless Collaboration with Other Applications

Sharpdesk Mobile allows seamless file sharing with other applications. Users can attach scanned files to email, share documents with other supported mobile applications or print files from other supported mobile applications.

Print

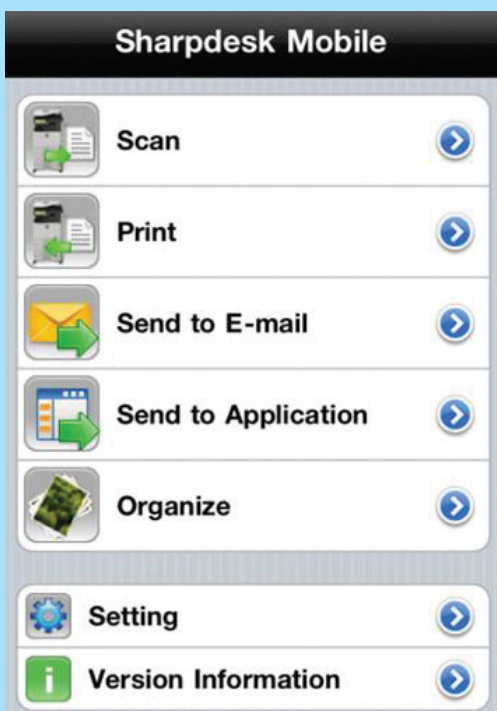

- Conveniently print PDF, JPEG & TIFF files from an iPhone, iPad or Android device to a supported Sharp MFP
- Print files from other supported mobile applications
- Easily print email attachments from your supported mobile device

Scan & Share

- Scan and save files from a supported MFP to your iPhone, iPad or Android device
- Quickly email scanned files from your supported mobile device
- Share scanned files with other supported mobile applications

Setup

- Available at no cost on the Apple App Store and Android Market
- Automatically discover and connect to a supported Sharp MFP
- Manually add a supported Sharp MFP
- No driver installations

SHARPEDESK MOBILE WORKFLOW

WELCOME TO SHARP

Sharp has been manufacturing fast, reliable printers and MFPS - and devising new, more productive ways of managing documents - for decades. Many have won awards from respected independent research establishments. All have delivered class-leading performance, often transforming productivity in the workplace.

Sharp is a truly global company with local representation in all major countries. And our expertise now extends far beyond the realm of office printing. Today we address the needs of the whole enterprise, with innovations in LCDs, laser diodes, flash memory, solar cells, plasmacluster air purifiers, and projectors, to name just a few.
